Telecom Devices, Handset Financing and Warranty.

Handset financing. A handset can be paid upfront or spread over 24 monthly instalments at 0 percent interest, added to the monthly bill. The device is owned by the customer from day one; the instalments are a separate line on the invoice and survive a plan change. Settling the balance early is free and can be done at any time in the app.

Upgrade policy. After 12 paid instalments, a customer may trade in the handset and upgrade. The remaining balance is cleared by the trade-in value if the device is in good condition, meaning it powers on, has no cracked screen and no liquid damage.

Manufacturer warranty. All handsets carry a 24-month manufacturer warranty covering defects, but not accidental damage, liquid damage or a battery worn by normal use. A warranty repair takes 5 to 10 business days, and a loan device is provided free of charge for repairs expected to exceed 5 days.

Device protection. Optional device insurance costs 7 euros/month and covers accidental damage, liquid damage and theft, with a 50 euro excess per claim and a maximum of two claims per 12 months. Insurance must be added within 30 days of purchasing the handset.

Lost or stolen. Report a lost or stolen handset immediately so the SIM can be blocked. A replacement SIM keeping the same number costs 10 euros and is issued in store the same day. Instalments continue during any insurance claim.
