Topnet Business Offers.

Business fibre. Topnet Pro 100 (100 Mbps, 150 dinars/month), Pro 200 (200 Mbps, 220 dinars/month) and Pro 500 (500 Mbps symmetric, 400 dinars/month). All Pro plans include a fixed public IP address, priority fault handling and a business-grade router.

Uptime commitment. Pro plans carry a 99.5 percent monthly uptime commitment. A fault is answered within 2 hours and a technician is on site within one business day. Each full day of outage beyond that is credited at one thirtieth of the monthly fee.

Backup line. A 4G backup that fails over automatically when the fibre drops costs 40 dinars/month and includes 100 GB. It is recommended for businesses taking card payments, since a card terminal is unusable without a connection.

Hosting and domains. A .tn domain costs 40 dinars/year and a .com 60 dinars/year. Shared web hosting starts at 15 dinars/month with 10 GB of storage and business email. A virtual private server starts at 90 dinars/month.

Installation. Business installation is scheduled within 5 business days and is free on a 24-month commitment. A survey is carried out first where the building is not already connected, which can add 10 business days.

Billing. Business accounts are invoiced monthly with 30-day terms, and a VAT invoice is issued for every payment. Payment is by bank transfer, standing order or card.
